PROFESSIONAL EXPERIENCE

FullStack Developer   04/2022 – 01/2024
Auryn Web to Print 🔗   Videira - SC, Brasil

As a Full Stack Developer, I contributed to the development and maintenance of systems using technologies such as JavaScript, jQuery, Vue.js, Angular, PHP, Symfony, Python, Golang, Docker and services like AWS and RabbitMQ, alongside monitoring tools.

Additionally, I actively participate in the Support and Sales teams, assisting in the training of new team members and conducting meetings with clients to showcase the platform.

Python Developer   2024
Instituto Revolution

Responsible for refactoring broken analytical apps using Python as main language, followed by Dash framework and API's such as Facebook Graph API.

Lead Full Stack Developer and Team Leader   2024
Pixel Labo

Currently leading the Pixel Labo team, our goal is to introduce to the market a fast and efficient platform designed to work in a modular fashion.

We currently offer the Online Photo Printing module tailored for photography studios, photo shops, and photographers.

Additionally, we are in the final stages of developing the module for Product Sales, which, besides catering to the aforementioned sectors, will also be fully applicable to snack bars, grocery stores, and similar establishments.
